## Top Anchors by Backlinks

We haven't found any Anchor Text data for this site.

## Top Referring Domain Geographies

We haven't found any Geographic Data for this site.

## On-Page Link Structure

We found 62 total links. 26% of your links are external links and are sending authority to other sites. 0% of your links are nofollow links, meaning authority is not being passed to those destination pages.

## Friendly Links

Some of your link URLs do not appear friendly to humans or search engines.

We would recommend making URLs as readable as possible by reducing length, file names, code strings and special characters.

# Usability

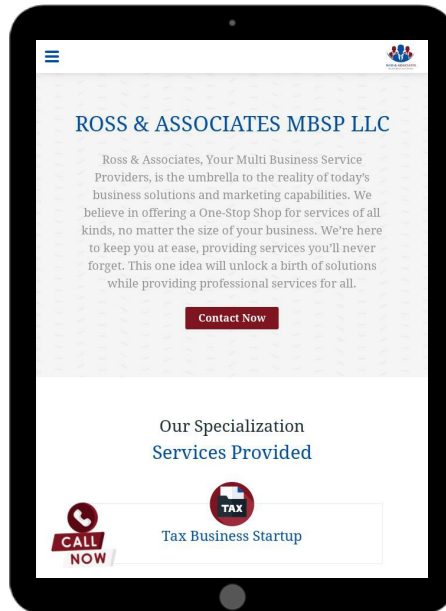

## Your usability needs improvement

Your page has usability issues across devices. Usability is important to maximize your available audience and minimize user bounce rates (which can indirectly affect your search engine rankings).

### Device Rendering

This check visually demonstrates how your page renders on different devices. It is important that your page is optimized for mobile and tablet experiences as today the majority of web traffic comes from these sources.

### Google's Core Web Vitals

Google is indicating that they do not have 'sufficient real-world speed data for this page' in order to make a Core Web Vitals assessment. This can occur for smaller websites or those that are not crawl-able by Google.

### Use of Mobile Viewports

Your page specifies a viewport matching the device's size, allowing it to render appropriately across devices.

## Google's PageSpeed Insights - Mobile

Google is indicating that your page is scoring poorly on their Mobile PageSpeed Insights evaluation.

Note that this evaluation is being performed from US servers and the results may differ slightly from an evaluation carried out from Google's PageSpeed Web Interface as that reporting localizes to the region in which you are running the report.

Google has indicated that the performance of a webpage is becoming more important from a user and subsequently ranking perspective.

Lab Data	Value	Opportunities	Estimated Savings
First Contentful Paint	11.9 s	Eliminate render-blocking resources	10.39 s

#### Flash Used?

No Flash content has been identified on your page.

#### iFrames Used?

There are no iFrames detected on your page.

#### Favicon

Your page has specified a favicon.

#### Email Privacy

Email addresses have been found in plain text.

We recommend removing any plain text email addresses and replacing them with images or contact forms. Plain text email addresses can be susceptible to scrapers and email spammers.

#### Legible Font Sizes

There is some text on your page that is small and may not be legible enough for particular users.

We recommend reviewing all text on your page in different devices to ensure that it is of appropriate size.

#### Tap Target Sizing

Some of the links or buttons on your page may be too small for a user to easily tap on a touchscreen.

Consider making these tap targets larger to provide a better user experience.

## Performance Results

### Your performance is good

Your page has performed well in our testing meaning it should be reasonably responsive for your users, but there is still room for improvement. Performance is important to ensure a good user experience, and reduced bounce rates (which can also indirectly affect your search engine rankings).

## Page Speed Info

Your page loads in a reasonable amount of time.

### Server Response

### All Page Content Loaded

### All Page Scripts Complete

## Download Page Size

Your page's file size is reasonably low which is good for Page Load Speed and user experience.

### Download Page Size

## Google Accelerated Mobile Pages (AMP)

This page does not appear to have AMP Enabled.

### JavaScript Errors

Your page is not reporting any JavaScript errors.

### HTTP2 Usage

Your website is using the recommended HTTP/2+ protocol.

### Optimize Images

All of the images on your page appear to be optimized.

### Minification

Some of your JavaScript or CSS files do not appear to be minified.

Minification is a reasonably simple way to reduce page size, and subsequently load time.

### Deprecated HTML

No deprecated HTML tags have been found within your page.

### Inline Styles

Your page appears to be using inline styles.

Inline styles are an older coding practice and discouraged in favor of using CSS style sheets, due to their ability to degrade page load performance and unnecessarily complicate HTML Code.

## Social Results

### Your social is good

You have a reasonably good social presence. Social activity is important for customer communication, brand awareness and as a marketing channel to bring more visitors to your website. We recommend that you have all of your profiles listed on your page, and work to build a larger following on those networks.
